IRIS  
PEONIES  
POPPIES  
HEMEROCALLIS

We have assembled the finest Iris creations in the most beautiful color tones available. You will note, the newer varieties because of scarcity are relatively more expensive. The others are only a few years older, which can be had at a most moderate price. Our Japanese Iris is one of the most beautiful collections to be had. Large, and mostly double varieties of the most beautiful form and colors. The Hemerocallis consists of the very finest and up-to-date varieties. They can be grown in any part of the United States. Hardy and most reliable bloomers in a very distinct color range. The Peonies as you can see answer for themselves, with the great assortment of Hybrids and Species, many of these are rare and very scarce varieties. The Poppies are the most colorful of all Perennials and we are listing only the most beautiful varieties. All plants are large, husky field grown and free from disease. Each year we supply a great amount of Leaf Mold and Bonemeal to the soil, thereby producing the healthiest root to ship to ship to you. You will be more than amazed when you receive our large organically grown field plants.

**TERMS: CASH WITH ORDER.** All orders \$3.00 and over shipped postpaid anywhere in the United States. On orders less than \$3.00 add 25 cents for postage and handling. Be sure to state your express office if different from your post office.

**WE GUARANTEE** all plants to be true to name, free from insect pest and disease. All our plants are state inspected.

1950 INTRODUCTIONS

(FRONTIER (P. J. FASS 1950) (DAUNTLESS X FRANCHVILLE) X (CHEERIO) (X RADIANT) A beautiful rich bright red with an orange glow, giving the flower great brilliance. One of the finest reds for exhibition as well as garden display. The large flowers are delightfully spaced on strong four way branching stalks. Very floriferous. 38". ..... 20.00

(VELVA (P. J. FASS 1950) (ROSY WINGS X MING YELLOW) (X THE RED DOUGLAS) Very large flowers of a smooth rich wine-red. The flowers have a plush like texture. The coloring is so deep, it appears to have a velvet finish. Flowers of wide flaring falls fluted and coming to a point. The beard is extra long and very bushy golden orange. Strong stalks with four-way branching. 38". ..... 20.00

<b>VIOLET HERRINGTON:</b> Large lovely violet double.	.75
<b>WHITE GIANT:</b> Large double pure white.	.75

## RARE NEW HEMEROCALLIS

HEMEROCALLIS commonly called DAYLILIES have set a new craze to the flower collector. These flowers have undergone a period of development in the past few years which makes it quite difficult to keep abreast with the best of the newest. Astounding new colors and combinations of colors have been created by the great efforts of hybridizers, causing very much excitement. We offer one of the finest collections of HEMEROCALLIS to be had.

**CULTURE:** Daylillies are very easily grown without any fuss or bother, but like any other flower if one wants fine giant blooms it is best to grow them in a well drained soil to which has been added plenty of Oak Leaf Mold, Cow Manure or Dry Cow Manure and a little bone-meal. Do not use any strong fertilizers for this may burn the fleshy roots.

**AUGUSTA PIONEER (STOUT)** Late blooming chrome orange with outer petals flushed red. 28". August and September. .50

**AUTUMN PRINCE (STOUT)** Clear light yellow on many well branched stalks. 42". August. 1.00

## ORIENTAL POPPIES

The vivid, brilliant, splashing of color enlightens your garden when the color is needed. We have about the finest collection there is to be had in ORIENTAL POPPIES.

**CULTURE.** Poppies are best planted during their dormant season, which is about August 1st. Plant in well drained soil to which compost has been added. Make sure the crown is placed 2 to 3 inches below the soil surface, then in fall cover ground all around with mulch to prevent heaving during winter.

ORDERS NOT ACCEPTED AFTER AUGUST 1st.
